PROJECTS

AI Sponsor Finder <https://github.com/weihsuanlee/v0-ai-sponsor-finder>

Full-stack web application that matches sports clubs with relevant sponsors using AI-driven demographic analysis and generates personalized pitch materials.

- Built responsive frontend with Next.js 14, React, TypeScript, Tailwind CSS, and shadcn/ui, supporting dark/light themes and multi-language UI (EN/FR/DE)
- Designed guided onboarding flow with CSV/Excel upload, demographic parsing, and real-time data visualization using Recharts
- Implemented AI-powered sponsor matching and pitch generation using Google Gemini via Vercel AI SDK with structured outputs and explainable reasoning
- Developed a controller-based “Smart Sponsor Evaluator” agent that dynamically orchestrates website parsing, search, profile extraction, and sponsor fit scoring
- Built Kanban-style tracking board with drag-and-drop pipeline management for sponsor outreach

Formrrito <https://github.com/capyba-ramen/formrrito-frontend>

Full-stack application enabling custom form creation with AI assistance

- Architected frontend using React, TypeScript, and Material UI with SWR for data fetching
- Integrated OpenAI API for intelligent question generation and form optimization
- Built real-time analytics dashboard with Chart.js and automated Excel export functionality
- Deployed on AWS EC2 with CI/CD pipeline using GitHub Actions and Nginx
- Collaborated in a 2-person team from design (Figma) to deployment
